AliveColors 8.0: AI-Powered Object Selection & Improvements in Cloning Tools

June 27, 2023 — AKVIS announces a major update of the AliveColors cross-platform graphics editor. Version 8.0 introduces new AI-based selection tools, important improvements in the Clone Stamp and Chameleon Brush tools, and a set of other changes and fixes.

AliveColors is a powerful graphics editor becoming more efficient with each new version. AliveColors contains a wide range of retouching and drawing tools, photo editing adjustments, color correction options, artistic effects, neural filters, presets and textures libraries. The program contains a set of the built-in AKVIS plugins and some other developments of the AKVIS company.

The latest update includes a number of improvements that make the program even more convenient, enjoyable, and rich in features.

Version 8.0 offers two new AI-based selection features: the *Object Selection* tool and the *Select Subject* command. These handy tools are perfect for quick, automatic selection of image areas and save time in design tasks and projects. New selection tools are available for all license types, including the Free version of AliveColors.

The *Clone Stamp* and *Chameleon Brush* tools have been improved with the new features: the Sample menu and the Clone Source settings. These cloning, healing, and creative tools are now even more helpful and flexible. The new features make it easier to work with complex documents.

In addition, the update includes many improvements in tools, file formats, and other enhancements, as well as bug fixes and increased stability.

The graphics editor is available for download at alivecolors.com. The trial period includes 10 days of fully functional use.

AliveColors is cross-platform and runs on Windows 7-11, macOS 10.12-13.0 (M1/Intel), and Linux OS. The program supports a multi-language interface, configurable by switching in the program preferences.

AliveColors Free with slightly limited functionality is available for everyone for personal use. Also, the program comes in full featured lifetime licenses: **AliveColors Home** ($55) for personal use and **AliveColors Business** ($160) for commercial use.

The update is free for all users who bought the software in the last 12 months. Users with older versions, whose license is not valid for AliveColors 8.0, can update the program for $20.
